📍 Tbilisi, Georgia

SKILLS

- Java
- Spring framework
- Jakarta EE
- Javascript
- Typescript
- React.js
- Vue.js
- C++
- C#
- MySQL
- MongoDB
- PostgreSQL

WORK EXPERIENCE

Georgia & Tours

<https://github.com/Daniel160407/Tour-Site-Back>

March - June 2024

<https://georgiaandtours-83fafaad1b6e.herokuapp.com/tours>

- This is my first real project. There you can look up tour you want and then contact to Admin to order the tour. In this project I learnt, how to work with spring framework, websockets, web security and others.

PROJECT

Bible

June 2024

- GitHub: <https://github.com/Daniel160407/Bible2.0>
- Website: <https://bibleverses24.netlify.app/home>
- This application is designed for churches to display verses on projectors. Initially, I developed it using JavaFX; however, after receiving feedback from users who wanted to install the app on their computers, I decided to redesign it as a web application.
- For the frontend, I used React.js, and I integrated the Holy Bible API to retrieve the verses

WordsTeacher

June 2024

- GitHub: <https://github.com/Daniel160407/WordsTeacher2.0-Back>
- This application is designed to help users learn new German words using a specific methodology. It features tests for translating words, allowing users to check their answers afterward. Additionally, it includes a dictionary for easy reference.
- I used Java (Spring framework), MySQL, React.js and other frameworks
