SKILLS

- Java
- Spring framework
- Spring MVC
- Spring Data
- Spring Security
- WebSocket
- JWT
- Jakarta EE
- MySQL
- MongoDB
- PostgreSQL

WORK EXPERIENCE

Guru Games

https://github.com/Daniel160407/GuruGames-Back   March - June 2025

- This website allows users to book rooms at the Guru Games headquarters for video gaming sessions. They
- can also contact Guru Games to find out where the headquarters are located. This website helped a small
- company to grow and achieve its goals. Working on this project taught me how to work in a team and how to
- use external APIs.

Georgia & Tours

https://github.com/Daniel160407/Tour-Site-Back   March - July 2024

- This is my first real project. There you can look up tour you want and then contact to Admin to order the tour.
- In this project I learnt, how to work with spring framework, websockets, web security and others.

PROJECT

WordsTeacher

- GitHub: https://github.com/Daniel160407/WordsTeacher2.0-Back
- This application is designed to help users learn new words using a specific methodology. A website features translation tests, with the option to check answers afterwards. It also includes a dictionary and smart statistics that track all activities during the learning process, with features that make learning more attractive and exciting, like advancements and day streak. Also, it has some premium features, that makes a profit for me.
- I used Java (Spring framework), MySQL, React.js and other frameworks

Quizilla

- GitHub: https://github.com/Daniel160407/Quizilla-Back
- Quizilla is an interactive, real-time quiz platform designed for both fun and educational use. Players can join games, select avatars, and compete in a variety of question types — from multiple choice to true/false — while enjoying a sleek neon-inspired interface with light/dark mode support.
- With Projector Mode, hosts can display live questions, scores, and winner podiums to an audience, making it perfect for classrooms, events, and competitions. The WebSocket-powered backend ensures lightning-fast response handling, while the dynamic scoring system rewards speed and difficulty mastery.
- Administrator can easily manage games through an Admin Panel, adding or editing questions, categories, and settings. Quizilla also supports YouTube video embedding for richer, more engaging content.
